Re: U-77772 Ut-023

Dear Mr. Nelson:

Enclosed please find two sets of photographs, one set for your files and one set for Utah State files. These photographs should help document plot and pre-existing surface disturbances in the vicinity of the mining sites for Ultradent OC 1-8 claims located in Tooele County in Utah.

These photographs clarify our reclamation plan listed in item eight in our plan of operations. Please note that there has been degradation from previous trenches, as well as scarring of slopes with waste dumps and tailings piles, which would make reclamation more difficult.

In regard to stabilization of slopes, re-soiling and re-vegetation, Ultradent is only responsible for the areas we disturb. However, under a feasibility study of pre-existing disturbances, Ultradent would assist in the reclamation of these areas per our plan of operations, which is modified to different locations within the OC 1-8 mining claims.

Respectfully yours,

Harvey Chatwin
Manager, New Construction
